

Pharmacogenomic Testing

Benefit Overview

- [Assembly Bill \(AB\) 425](#), signed into California state law in October 2023, will add pharmacogenomic testing as a covered benefit under the California State Medicaid program.
- Effective **July 1, 2024**, Molina Healthcare of California (MHC) members are entitled to receive these services under the Medi-Cal program.
- Pharmacogenomic testing is defined as laboratory genetic testing.
- This type of testing uses available and evidence-based technologies, such as panel tests, to evaluate how individual genetics affect the following components of medication use:
 - Safety
 - Efficacy
 - Toxicity
 - Metabolism

Pharmacogenomic testing:
