

To search this document, type in the keyword or code you are looking for by pressing press Ctrl F on your keyboard.
Please contact Molina at 1-855-322-4080 if you need more information about the Third-Party Proprietary Criteria referenced in this document.
Information that indicates certain items or services do not require authorization in this Prior Authorization (PA) Code Matrix document is only applicable for Participating Providers.
FOR ANY PA CHANGES DUE TO REGULATORY GUIDANCE RELATED TO COVID 19 – PLEASE SEE PROVIDER NOTIFICATIONS AND MOST CURRENT INFORMATION ON THE PROVIDER PORTAL.

Most Non-Participating Providers require authorization regardless of services or codes (see exceptions to rule below).
Prior authorization exceptions for Non-Participating Offices/Providers/Facilities:
•Emergency Department Services;
•Local Health Department (LHD) services
•Other services based on State requirements
•Professional fees associated with an Emergency Department visit and approved Ambulatory Surgery Center (ASC) or in-patient stay
•Prior authorization is waived for all Radiology, Anesthesiology, and Pathology services when billed in Place of Service Code 19, 21, 22, 23 or 24
•Prior authorization is waived for professional component services or services billed with Modifier 26 in ANY place of service setting
All In-Patient admits and services require Prior Authorization, including: Acute Hospital, Neonatal Intensive Care Unit (NICU), Skilled Nursing Facilities (SNF), Rehabilitation, Hospice and Long-Term Acute Care (LTAC) Facilities.
Observation stays require a prior authorization after the first 48 hours.
The codes below are for Out-Patient services only.
Some services listed may not be covered by the Marketplace benefit plan. CMS or your local State Regulatory Agency determines many of the plan benefits. The absence of a code from this list does not mean that a service is a covered benefit.

Refer to the explanation of coverage (EOC) and Summary of Benefits for plan benefit information.

Prior authorizations are not required for the following:

- Emergency Services for Participating or Non-Participating Providers.
- Office visits or office-based procedures at Participating Providers unless specifically required in another category.
- Referrals to Participating Network Specialists.

Prior Authorization is not a guarantee of payment for services. Payment is made in accordance with a determination of the member's eligibility on the date(s) of service (for Marketplace members this includes grace period status), benefit limitations or exclusions and other applicable standards during the claim review, including the terms of any applicable provider agreement. For additional information on a member's grace period status, please contact Molina Healthcare 1-855-322-4080.

Most gene therapy is not covered for Marketplace members. Molina covers limited gene therapy services in accordance with our medical policies, subject to Prior Authorization.

Prior authorization is not required for Texas Gold Card Providers ONLY for the specific codes determined to be exempt for each individual provider.

The prior authorization information reflected on this document is general in nature and is not intended to be relied upon in making medical decisions. The criteria listed below is generally accurate, but may be different based on factors such as specific medical condition or type of provider requesting the service. Each patient will have unique medical conditions, submitted by his/her physician in a particularized manner, that will factor into documents required, criteria applied, and Molina's decision of whether to approve or deny a requested service. Please contact Molina or your doctor to get more information regarding prior authorization for any particular service.

This document is NOT to be utilized to make benefit coverage determinations.

<p>Healthcare Administered Drugs/Pharmacy Drug Coverage: Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement.</p> <p>Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MHI and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs.</p> <p>The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Please contact your Provider Relations Representative with any further questions about the program. Pharmacy authorization regardless of CPT/HCPC code requests should be faxed to: 888-487-9251.</p>	9/1/2019	90281	IMMUNE GLOBULIN IG HUMAN IM USE	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. Experimental & Investigational Procedures	4/1/2020	0573T	Removal of substernal implantable defibrillator electrode	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0574T	Repositioning of previously implanted substernal implantable defibrillator-pacing electrode	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0575T	Programming device evaluation (in person) of implantable cardioverter-defibrillator system with substernal electrode, with iterative adjustment of the implantable device to test the function of the device and select optimal permanent programmed values with analysis, review and report by a physician or other qualified health care professional	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0576T	Interrogation device evaluation (in person) of implantable cardioverter-defibrillator system with substernal electrode, with analysis, review and report by a physician or other qualified health care professional, includes connection, recording and disconnection per patient encounter	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	4/1/2020	0577T	Electrophysiological evaluation of implantable cardioverter-defibrillator system with subdermal electrode (includes defibrillation threshold evaluation, induction of arrhythmia, evaluation of sensing for arrhythmia termination, and programming or reprogramming of sensing or therapeutic parameters)	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0578T	Interrogation device evaluation(s) (remote), up to 90 days, subdermal lead implantable cardioverter-defibrillator system with interim analysis, review(s) and report(s) by a physician or other qualified health care professional	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0579T	Interrogation device evaluation(s) (remote), up to 90 days, subdermal lead implantable cardioverter-defibrillator system, remote data acquisition(s), receipt of transmissions and technician review, technical support and distribution of results	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0580T	Removal of subdermal implantable defibrillator pulse generator only	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	4/1/2020	0581T	Ablation, malignant breast tumor(s), percutaneous, cryotherapy, including imaging guidance when performed, unilateral	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0582T	Transurethral ablation of malignant prostate tissue by high-energy water vapor thermotherapy, including intraoperative imaging and needle guidance	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0583T	Tympanostomy (requiring insertion of ventilating tube), using an automated tube delivery system, iontophoresis local anesthesia	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Transplants/Gene Therapy: (Including Solid Organ and Bone Marrow) Corneal Transplants Do Not Require Prior Authorization	4/1/2020	0584T	Islet cell transplant, includes portal vein catheterization and infusion, including all imaging, including guidance, and radiological supervision and interpretation, when performed; percutaneous	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Small Bowel Multivisceral Transplantation	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Transplants/Gene Therapy: (Including Solid Organ and Bone Marrow) Corneal Transplants Do Not Require Prior Authorization	4/1/2020	0585T	Islet cell transplant, includes portal vein catheterization and infusion, including all imaging, including guidance, and radiological supervision and interpretation, when performed; laparoscopic	Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information.	Molina Clinical Policy: Small Bowel Multivisceral Transplantation	
Transplants/Gene Therapy: (Including Solid Organ and Bone Marrow) Corneal Transplants Do Not Require Prior Authorization	4/1/2020	0586T	Islet cell transplant, includes portal vein catheterization and infusion, including all imaging, including guidance, and radiological supervision and interpretation, when performed; open	Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information.	Molina Clinical Policy: Small Bowel Multivisceral Transplantation	
Experimental & Investigational Procedures	4/1/2020	0587T	Percutaneous implantation or replacement of integrated single device neurostimulation system including electrode array and receiver or pulse generator, including analysis, programming, and imaging guidance when performed, posterior tibial nerve	Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information.	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0588T	Revision or removal of integrated single device neurostimulation system including electrode array and receiver or pulse generator, including analysis, programming, and imaging guidance when performed, posterior tibial nerve	Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information.	Molina Clinical Policy: Experimental and Investigational Services	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	4/1/2020	0589T	Electronic analysis with simple programming of implanted integrated neurostimulation system (eg, electrode array and receiver), including contact group(s), amplitude, pulse width, frequency (Hz), on/off cycling, burst, dose lockout, patient-selectable parameters, responsive neurostimulation, detection algorithms, closed-loop parameters, and passive parameters, when performed by physician or other qualified health care professional, posterior tibial nerve, 1-3 parameters	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	4/1/2020	0590T	Electronic analysis with complex programming of implanted integrated neurostimulation system (eg, electrode array and receiver), including contact group(s), amplitude, pulse width, frequency (Hz), on/off cycling, burst, dose lockout, patient-selectable parameters, responsive neurostimulation, detection algorithms, closed-loop parameters, and passive parameters, when performed by physician or other qualified health care professional, posterior tibial nerve, 4 or more parameters	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0594T	Osteotomy, humerus, with insertion of an externally controlled intramedullary lengthening device, including intraoperative imaging, initial and subsequent alignment assessments, computations of adjustment schedules, and management of the intramedullary lengthening device	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0596T	Temporary female intraurethral valve-pump (i.e., voiding prosthesis); initial insertion, including urethral measurement	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	7/1/2020	0597T	Temporary female intraurethral valve-pump (i.e., voiding prosthesis); replacement	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0598T	Noncontact real-time fluorescence wound imaging, for bacterial presence, location, and load, per session; first anatomic site (e.g., lower extremity)	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0599T	Noncontact real-time fluorescence wound imaging, for bacterial presence, location, and load, per session; each additional anatomic site (e.g., upper extremity) (List separately in addition to code for primary procedure)	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0600T	Ablation, irreversible electroporation; 1 or more tumors per organ, including imaging guidance, when performed, percutaneous	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	7/1/2020	0601T	Ablation, irreversible electroporation; 1 or more tumors, including fluoroscopic and ultrasound guidance, when performed, open	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0602T	Glomerular filtration rate (GFR) measurements), transdermal, including sensor placement and administration of a single dose of fluorescent pyrazine agent	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0603T	Glomerular filtration rate (GFR) monitoring, transdermal, including sensor placement and administration of more than one dose of fluorescent pyrazine agent, each 24 hours	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0604T	Optical coherence tomography (OCT) of retina, remote, patient-initiated image capture and transmission to a remote surveillance center unilateral or bilateral; initial device provision, set-up and patient education on use of equipment	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	7/1/2020	0605T	Optical coherence tomography (OCT) of retina, remote, patient-initiated image capture and transmission to a remote surveillance center unilateral or bilateral; remote surveillance center technical support, data analyses and reports, with a minimum of 8 daily recordings, each 30 days	<ul style="list-style-type: none"> Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0606T	Optical coherence tomography (OCT) of retina, remote, patient-initiated image capture and transmission to a remote surveillance center unilateral or bilateral; review, interpretation and report by the prescribing physician or other qualified health care professional of remote surveillance center data analyses, each 30 days	<ul style="list-style-type: none"> Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0607T	Remote monitoring of an external continuous pulmonary fluid monitoring system, including measurement of radiofrequency-derived pulmonary fluid levels, heart rate, respiration rate, activity, posture, and cardiovascular rhythm (e.g., ECG data), transmitted to a remote 24-hour attended surveillance center; set-up and patient education on use of equipment	<ul style="list-style-type: none"> Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2020	0608T	Remote monitoring of an external continuous pulmonary fluid monitoring system, including measurement of radiofrequency-derived pulmonary fluid levels, heart rate, respiration rate, activity, posture, and cardiovascular rhythm (e.g., ECG data), transmitted to a remote 24-hour attended surveillance center; analysis of data received and transmission of reports to the physician or other qualified health care professional	<ul style="list-style-type: none"> Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. Experimental & Investigational Procedures	7/1/2021	0649T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained with diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) (List separately in addition to code for primary procedure)	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2021	0650T	Programming device evaluation (remote) of subcutaneous cardiac rhythm monitor system, with iterative adjustment of the implantable device to test the function of the device and select optimal permanently programmed values with analysis, review and report by a physician or other qualified health care professional	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	7/1/2021	0651T	Magnetically controlled capsule endoscopy, esophagus through stomach, including intraprocedural positioning of capsule, with interpretation and report	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2021	0652T	Esophagogastroduodenoscopy, flexible, transnasal; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2021	0653T	Esophagogastroduodenoscopy, flexible, transnasal; with biopsy, single or multiple	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2021	0654T	Esophagogastroduodenoscopy, flexible, transnasal; with insertion of intraluminal tube or catheter	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	7/1/2021	0655T	Transperineal focal laser ablation of malignant prostate tissue, including transrectal imaging guidance, with MR-fused images or other enhanced ultrasound imaging	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	7/1/2021	0656T	Vertebral body tethering, anterior; up to 7 vertebral segments	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	
Experimental & Investigational Procedures	1/1/2024	0657T	Vertebral body tethering, anterior; 8 or more vertebral segments	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0658T	Electrical impedance spectroscopy of 1 or more skin lesions for automated melanoma risk score	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	1/1/2024	0660T	Implantation of anterior segment intraocular nonbiodegradable drug-eluting system, internal approach	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0661T	Removal and reimplantation of anterior segment intraocular nonbiodegradable drug-eluting implant	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0662T	Scalp cooling, mechanical; initial measurement and calibration of cap	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0663T	Scalp cooling, mechanical; placement of device, monitoring, and removal of device (List separately in addition to code for primary procedure)	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	1/1/2024	0664T	Donor hysterectomy (including cold preservation); open, from cadaver donor	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0665T	Donor hysterectomy (including cold preservation); open, from living donor	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0666T	Donor hysterectomy (including cold preservation); laparoscopic or robotic, from living donor	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0667T	Donor hysterectomy (including cold preservation); recipient uterus allograft transplantation from cadaver or living donor	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
Experimental & Investigational Procedures	1/1/2024	0668T	Backbench standard preparation of cadaver or living donor uterine allograft prior to transplantation, including dissection and removal of surrounding soft tissues and preparation of uterine vein(s) and uterine artery(ies), as necessary	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0669T	Backbench reconstruction of cadaver or living donor uterus allograft prior to transplantation; venous anastomosis, each	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
Experimental & Investigational Procedures	1/1/2024	0670T	Backbench reconstruction of cadaver or living donor uterus allograft prior to transplantation; arterial anastomosis, each	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Molina Clinical Policy: Experimental and Investigational Services	PA Modernization - PA requirements will be removed where covered.
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2024	0480T	FRACTIONAL ABL LSR FENESTRATION EA ADDL 100 SQCM	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Third Party Proprietary Criteria	Covered for Marketplace per 2158

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2024	0671T	Insertion of anterior segment aqueous drainage device into the trabecular meshwork, without external reservoir, and without concomitant cataract removal, one or more	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Third Party Proprietary Criteria	PA Modernization - PA requirements will be removed where covered.
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2024	0672T	Endovaginal cryogen-cooled, monopolar radiofrequency remodeling of the tissues surrounding the female bladder neck and proximal urethra for urinary incontinence	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Third Party Proprietary Criteria	PA Modernization - PA requirements will be removed where covered.
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2024	0673T	Ablation, benign thyroid nodule(s), percutaneous, laser, including imaging guidance	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Third Party Proprietary Criteria	PA Modernization - PA requirements will be removed where covered.
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2022	0674T	Laparoscopic insertion of new or replacement of permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including an implantable pulse generator and diaphragmatic lead(s)	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Third Party Proprietary Criteria	

Service Category Notes	Effective Date	Code	Definition	Criteria	Notes	
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2022	0675T	Laparoscopic insertion of new or replacement of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including connection to an existing pulse generator; first lead	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Third Party Proprietary Criteria	
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2022	0676T	Laparoscopic insertion of new or replacement of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including connection to an existing pulse generator; each additional lead (List separately in addition to code for primary procedure)	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Third Party Proprietary Criteria	
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2022	0677T	Laparoscopic repositioning of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including connection to an existing pulse generator; first repositioned lead	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. 	Third Party Proprietary Criteria	
OP Hosp/Amb Surgery Center (ASC) Procedures	1/1/2022	0678T	Laparoscopic repositioning of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including connection to an existing pulse generator; each additional repositioned lead (List separately in addition to code for primary procedure)	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. Healthcare Administered Drugs/Pharmacy Drug Coverage: Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement. Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MH and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs. The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Please contact your Provider Relations Representative with any further questions about the program. Pharmacy authorization regardless of CPT/HCPC code requests should be faxed to: 888-487-9251.	10/1/2019	A9274	EXTERNAL AMB INSULIN DEL SYSTEM DISPOSABLE EA	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. Healthcare Administered Drugs/Pharmacy Drug Coverage: Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement. Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MH and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs. The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Please contact your Provider Relations Representative with any further questions about the program. Pharmacy authorization regardless of CPT/HCPC code requests should be faxed to: 888-487-9251.	7/1/2022	A9596	Gallium ga-68 gozetotide, diagnostic, (Ilucix), 1 millicurie"	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. <p>Healthcare Administered Drugs/Pharmacy Drug Coverage:</p> <p>Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement.</p> <p>Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MHI and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs. The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Please contact your Provider Relations Representative with any further questions about the program. <p>Healthcare Administered Drugs/Pharmacy Drug Coverage: Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement. Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MH and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs. The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Please contact your Provider Relations Representative with any further questions about the program. Pharmacy authorization regardless of CPT/HCPC code requests should be faxed to: 888-487-9251.</p>	9/1/2019	J0121	INJECTION OMADACYCLINE 1 MG	Information generally required to support authorization decision making includes, but not limited to: •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. <p>Healthcare Administered Drugs/Pharmacy Drug Coverage: Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement.</p> <p>Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MH and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs.</p> <p>The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Please contact your Provider Relations Representative with any further questions about the program. Pharmacy authorization regardless of CPT/HCPC code requests should be faxed to: 888-487-9251.</p>	9/1/2019	J1602	INJECTION GOLIMUMAB 1 MG FOR INTRAVENOUS USE	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. Standard Oncology Criteria	
<p>Healthcare Administered Drugs/Pharmacy Drug Coverage: Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement. Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MH and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs. The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Healthcare Administered Drugs/Pharmacy Drug Coverage: Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement. Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MHI and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs. The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Please contact your Provider Relations Representative with any further questions about the program. Pharmacy authorization regardless of CPT/HCPC code requests should be faxed to: 888-487-9251.	4/1/2020	J7336	Capsaicin 8% patch, per square centimeter	Information generally required to support authorization decision making includes, but not limited to: <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information. <p>Healthcare Administered Drugs/Pharmacy Drug Coverage: Newly FDA approved medications such as "buy-and-bill" drugs are considered non-formulary and subject to non-formulary policies and other non-formulary utilization criteria until a coverage decision is rendered by the Molina Pharmacy and Therapeutics Committee. "Buy-and-bill" drugs are pharmaceuticals which a provider purchases and administers, and for which the provider submits a claim to Molina Healthcare for reimbursement.</p> <p>Many self-administered and office-administered injectable products require Prior Authorization (PA). In some cases they will be made available through Molina Healthcare's vendor, Caremark Specialty Pharmacy. Molina's pharmacy vendor will coordinate with MH and ship the prescription directly to your office or the member's home. All packages are individually marked for each member, and refrigerated drugs are shipped in insulated packages with frozen gel packs.</p> <p>The service also offers the additional convenience of enclosing needed ancillary supplies (needles, syringes and alcohol swabs) with each prescription at no charge. Please contact your Provider Relations Representative with any further questions about the program. Pharmacy authorization regardless of CPT/HCPC code requests should be faxed to: 888-487-9251.</p>	1/1/2021	J9281	MITOMYCIN PYELOCALYCEAL INSTILLATION, 1 MG	<p>Information generally required to support authorization decision making includes, but not limited to:</p> <ul style="list-style-type: none"> •Current (up to 6 months), adequate patient history related to the requested services such as: office and hospital records; •History of the presenting problem •Clinical exam; •Pertinent diagnostic testing results, operative and/or pathological reports; •Treatment plan and progress notes; •Pertinent psychosocial history; •Information and consultations with the treating practitioner; •Pertinent evaluations from other health care practitioners and providers; •Pertinent charts, graphs or photographic information, as appropriate; •Rehabilitation evaluations; •Information regarding the local delivery system; and •Patient characteristics and information.
