

Managing Your Medications Is Important To Us

Molina Healthcare has established quality assurance measures and systems in order to make sure that medications are used in a safe and effective manner. Our goal is to prevent medication errors and adverse drug reactions.

Our Quality Assurance program includes the following:

- Drug utilization review systems designed to ensure that a review of your drug therapy is performed before each prescription is dispensed, such as potential drug therapy problems due to over-utilization, under-utilization, drug-drug interactions, and drug-allergy interactions.
- Computerized drug utilization review systems designed to ensure ongoing periodic examination of prescription data and other records in order to identify drug therapy problems among Molina Healthcare members.
- Dosage checks to ensure that medications are used within guidelines set by the Food and Drug Administration (FDA).
- Reporting of our quality assurance practices to the Centers for Medicare & Medicaid Services.
